PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Engineer and Mobile Developer with hands-on experience building responsive web applications, cross-platform mobile applications (Flutter), enterprise management platforms (ERPNext & Frappe), and AI-integrated digital solutions. Proven expertise across Laravel, Django, Next.js, React, Python, Dart, and MySQL/PostgreSQL databases. Skilled in end-to-end software engineering, from designing intuitive user interfaces to architecting robust REST APIs, custom workflows, and maintaining live production software.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Cross-Platform Mobile Apps, Mobile UI/UX, REST API Integration.

Enterprise & ERP: ERPNext, Frappe Framework, Custom DocTypes, Server Scripts, Workflows, Webhooks, Filament v5 PHP.

Backend Development: Laravel, Django, Django REST Framework, Python, PHP, Node.js, Express, RESTful APIs, RBAC.

Frontend Development: Next.js, React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Figma.

Databases: MySQL, PostgreSQL, SQLite, Database Schema Design, Eloquent & Django ORM.

Tools & Workflow: Git, GitHub, Docker, Postman, cPanel Deployment, Agile Methodologies, UI/UX Design.

PROFESSIONAL EXPERIENCE

Junior Flutter Developer & ERPNext Engineer — TECHWISE SOLUTIONS

2026 – Present | Full-Time | Kampala, Uganda

- Worked hands-on in building, feature expansion, and continuous maintenance of cross-platform Flutter mobile applications.
- Engineered, customized, and maintained ERPNext & Frappe framework modules, building custom DocTypes, Python server scripts, workflows, and webhooks.
- Created secure Frappe REST APIs to seamlessly integrate ERPNext backend enterprise data with mobile apps and external third-party systems.
- Collaborated with cross-functional technical teams to debug, optimize, and maintain live enterprise production software.

Full Stack Software Engineer — Kendall Kitchen (Official Platform)

2026 | Personal Project | Live at kendallkitchen.com

- Architected and built a decoupled full-stack food ordering platform, corporate employee feeding subscription portal, and catering reservation system.
- Engineered responsive customer web frontend using Next.js, TypeScript, React, and Tailwind CSS with real-time menu browsing and checkout.
- Developed a robust Laravel REST API backend with Sanctum authentication, Spatie permissions, and custom business logic.
- Integrated Filament v5 administrative management panel for real-time inventory tracking and automated daily financial reconciliation.

Backend Developer — WestNile Education Trust Fund (WNETF)

2025 | Contract

- Built 20+ Django REST API endpoints for beneficiary management, document uploads, and automated reporting.
- Implemented role-based authentication and authorization to secure confidential student and donor records.
- Managed 5,000+ beneficiary records with MySQL database hosted on cPanel infrastructure.

Full Stack Developer — SACCO Management System

2024 | *Freelance*

- Built a Laravel backend powering loan management, member registration, savings tracking, and financial reporting.
- Developed a Flutter cross-platform mobile application for member self-service loan and savings access.

Full Stack Developer — Barolls Arua Limited

2023 | *Freelance* | *Live at barollsltd.com*

- Built company restaurant website with React frontend and Flask Python backend, integrating online food ordering and delivery management.

KEY PROJECTS & INNOVATIONS

Founder & Lead Engineer — Farmer's Companion

Next.js | *Django* | *Flutter* | *OpenAI* | *USSD* | *PostgreSQL*

- Designing an AI-powered multilingual farming assistant providing agricultural advice, pest diagnosis, and market prices.
- Integrated USSD and voice interfaces to enable offline accessibility for smallholder farmers on 2G feature phones.

EDUCATION & CERTIFICATIONS

Diploma in Computer Science

Women's Institute of Technology and Innovation (WITI)

Uganda Advanced Certificate of Education (UACE)

Mvara Secondary School — 2023
